Please **CLICK HERE** (<https://tinyurl.com/LENV181109-rsvp>) for registration.

This report is a practical guide for policy-makers and business leaders on the concrete opportunities offered by the low-carbon transformation of our global economies.

Its intended primary audience is economic and financial decision-makers in governments and businesses. The New Climate Economy work focuses on how to achieve both growth and climate action. With its strong evidence base spanning five priority action areas – energy, cities, food and land use, water, and industry and innovation - it aims to engage key champions to catalyse accelerated action in these areas in a way that delivers prosperity, development and profits.

It details immense opportunities that lie in a new form of inclusive, sustainable growth: this is the growth story of the 21st Century. But it also that accelerating action now is very urgent if we are to manage the grave risks of climate change. The key benefits are shown in this chart*:
